

FIRST ALERT®

First Alert VISTA® H3: The Evolution of Legacy Hybrid Intrusion System to Meet the Needs of Residential and SMB Applications

For over 30 years, the VISTA® platform has set the standard in trusted security, used in millions of installations across homes and businesses. Now, the First Alert VISTA H3 Series takes that legacy forward, combining the trusted performance of VISTA with advanced flexibility and scalability tailored for residential and small-to-medium business environments.

Enhance your offerings with simplified operations, seamless smart home integration, and a platform designed to strengthen customer relationships—helping you grow your business with every installation.

The VISTA H3 hybrid panel brings modular flexibility to a hybrid system, seamlessly integrating many of the same components as the ProSeries AIO ecosystem. With easy-to-install expansion slots, the VISTA H3 is designed to adapt to evolving end-user needs and new technologies. Customize each system to meet the unique demands of residential and small-to-medium business environments.

Common Programming Across Hybrid & AIO

Compatibility With V-Plex Protocol

SiX Two-Way Wireless Technology

Backward Compatibility for Easy Takeovers

AlarmNet 360 Management TC Remote Services

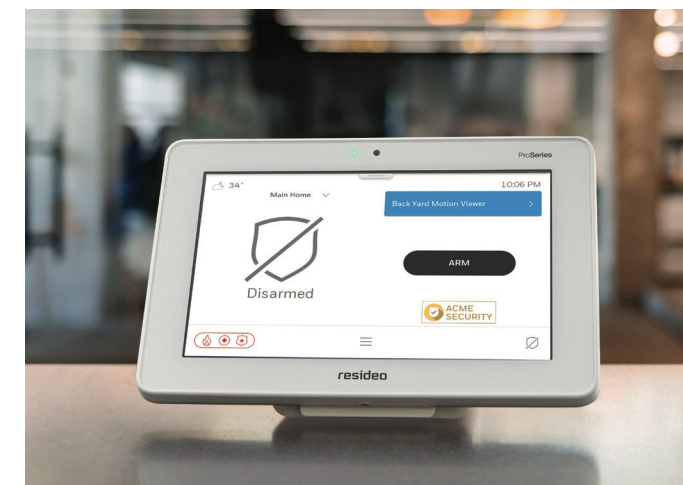

The panel comes with SiX Two-Way Wireless technology, utilizing true 128-bit AES encryption for a high level of security. SiX devices communicate with the alarm system via a fully encrypted bi-directional wireless signal, operating on 2.4GHz technology, providing robust and secure communication.

First Alert VISTA H3 Is the Flexible Hybrid Intrusion Panel Unlocking Smart Home and Building Technology

Flexible

Easily takeover existing systems with compatibility for 5800-series or competitive wireless sensors, hardwired sensors, relay modules, and other devices—saving on material and installation costs. Offer a complete end-to-end solution by adding video surveillance with local viewing on the wireless touchscreen or remote access via Total Connect® 2.0. Enhance safety with smoke, carbon monoxide, and heat detection, and provide seamless smart home control over thermostats, lights, locks, and more with simple plug-and-play integration.

Scalable

Easily support automation and smart home integrations with a plug-and-play WiFi/Z-Wave module, enabling seamless setup and expansion. With a 64-zone capacity, VISTA H3 is ideal for larger homes and light commercial applications. V-Plex compatibility offers a flexible, cost-effective installation, while two-way voice functionality helps reduce false alarms. This adaptable solution is designed to grow alongside a business or keep pace with evolving home technologies.

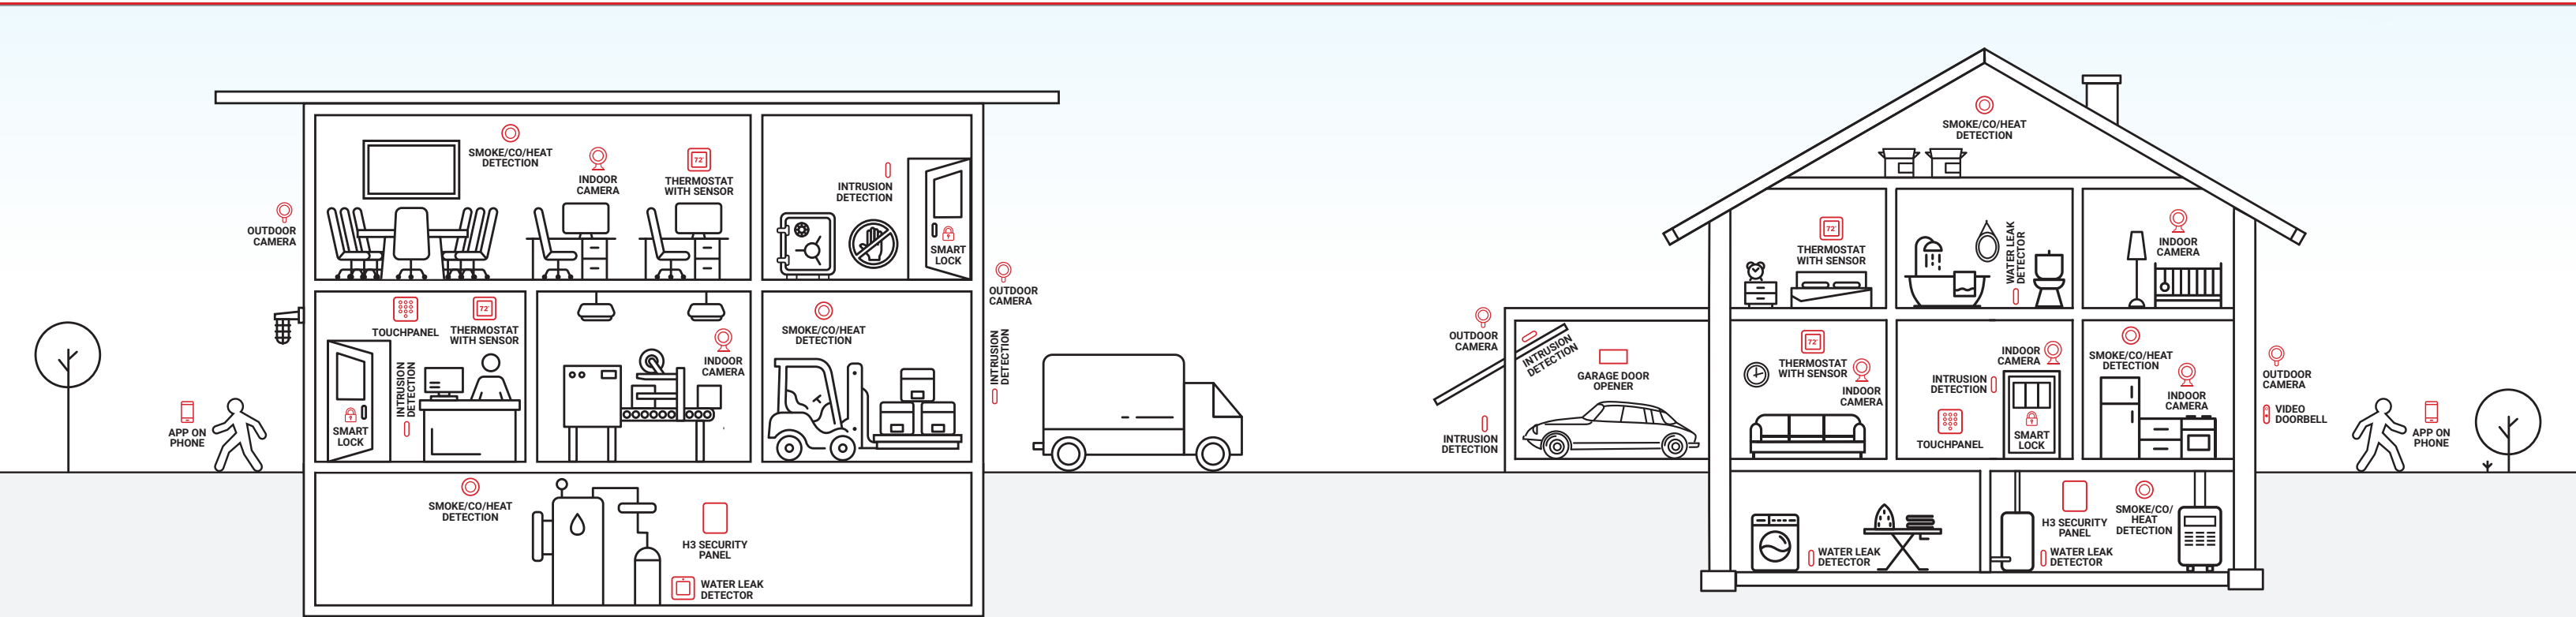

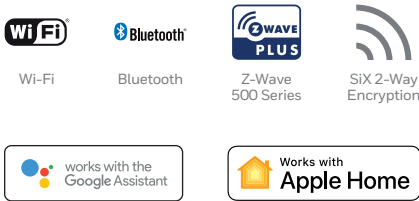

Insightful

VISTA H3 utilizes the same AlarmNet® 360 programming platform as the ProSeries, streamlining installation training. Remote diagnostics and system maintenance capabilities help reduce costly service calls, enhancing your operational efficiency. With AlarmNet 360's valuable insights, you can proactively monitor your customer base and identify potential attrition risks, empowering you to better manage and optimize your business.

Versatility To Serve a Variety of Installations, From Small & Medium Business to Residential.

The H3 hybrid panel solution is designed to serve a wide range of markets, from residential to small and medium-sized business applications. It provides a comprehensive security solution that is both adaptable and forward-thinking.

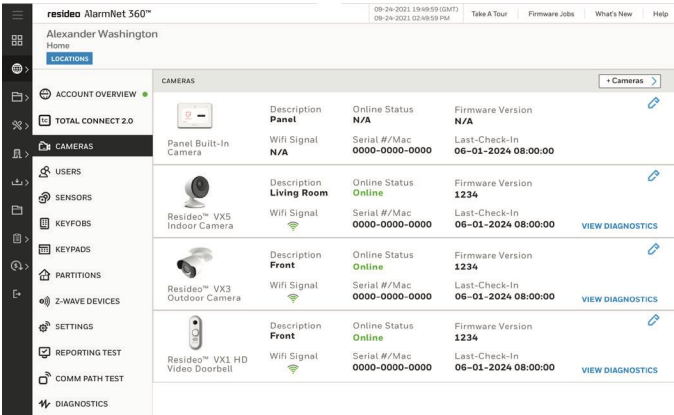

This forward-thinking approach of the VISTA H3 solution not only supports compatibility with current infrastructure but also provides a pathway for future enhancements. Whether it's a small business seeking robust security or a residential setup requiring reliable protection, the VISTA H3 hybrid panel adapts to meet diverse needs.

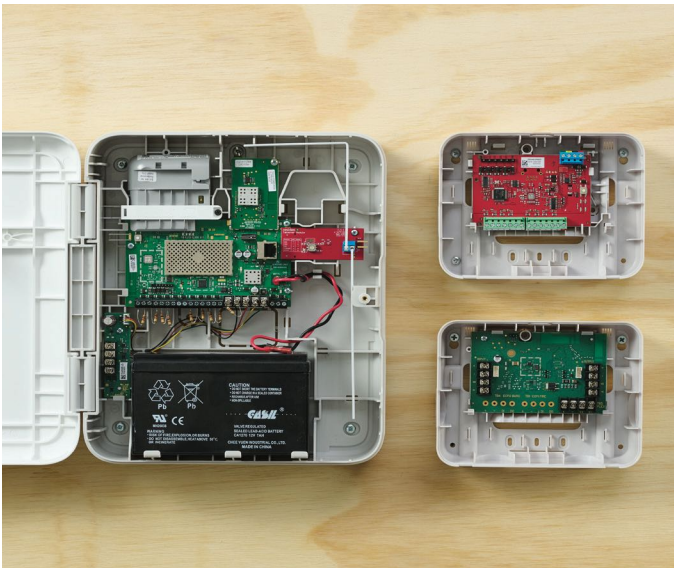

Simplified Design

Streamlined leveraging our proven installation, maintenance and programming methods and technologies.

Designed alongside its sister platform, the PRO Series AIO, the VISTA H3 utilizes the same easy-to-use AN360 installation tool, PROSIX sensors and modules with AES-128 encryption, the same TC2 end-user interface, and over-the-air software updates.

Optimized for cost effective inventory management and takeovers. Compatible with V-Plex protocol via a module reducing labor and cost, providing an economical expansion of peripheral devices. Leverages ProSeries hardware to increase hardware revenue per installation.

Designed with remote system diagnostics and over-the-air updates to ensure ongoing system performance and seamless integration with modern technology.

Scalable. Flexible. Insightful.

The First Alert VISTA H3 solution provides unmatched flexibility and modularity, offering a seamless transition for takeovers, upgrades, and awareness solutions. With ‘One-Go-All-Go’ connected life safety and a perfectly consistent experience across hardware and software, this solution is designed to grow effortlessly with your customers’ needs, making it easier than ever to deliver reliable, streamlined service.
